## Meetings

In the [Meetings](#) tab, statuses sync from Microsoft Teams and Outlook in real-time, giving you a view of all office activity.

## Rooms

Persistent project rooms, offices, and war rooms in our [Rooms](#) tab allows for centralized location for meetings and documents.

## People

A quick glance around the [People](#) tab will let you see if your colleagues are in a meeting, on a call, focusing or away.

## Insights

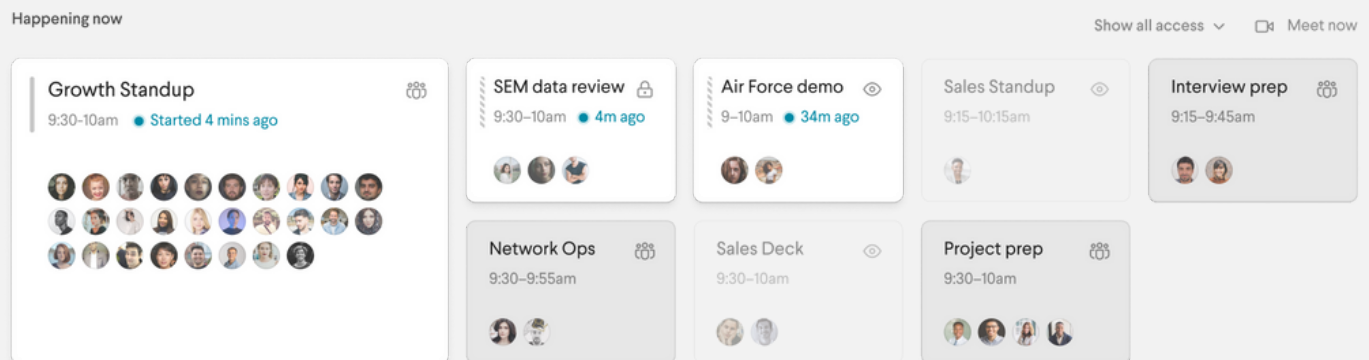

Access easily digestible metrics and set up alerts to improve team engagement and productivity from the [Insights](#) tab.

# Why add Frameable to Microsoft Teams?

Bring back spontaneous collaboration and reduce your team's reliance on scheduled meetings with Spaces, a powerful tool that fits within your Microsoft ecosystem.

**Increase visibility**

Enable employees to quickly and easily see who is working together and what they're working on.

**Optimize logistics**

Get rid of long-winded email chains and calendar back and forth with a bird's eye-view of all availability.

**Foster culture**

Make it easier for both new and established employees to build lasting relationships.

**Increase innovation**

Encourage employees to join the right conversations and brainstorm in real time.
